

HISAKA

High efficiency and rapid drying
CHEESE DRYER

Pair drying
MODEL **UEFC**

**ULTRA
EFFICIER**

The double blower structure offers high efficiency dehydration & drying.

- A connected, parallel and independent operations are possible.
- The effective method can be selected depending on the specification.

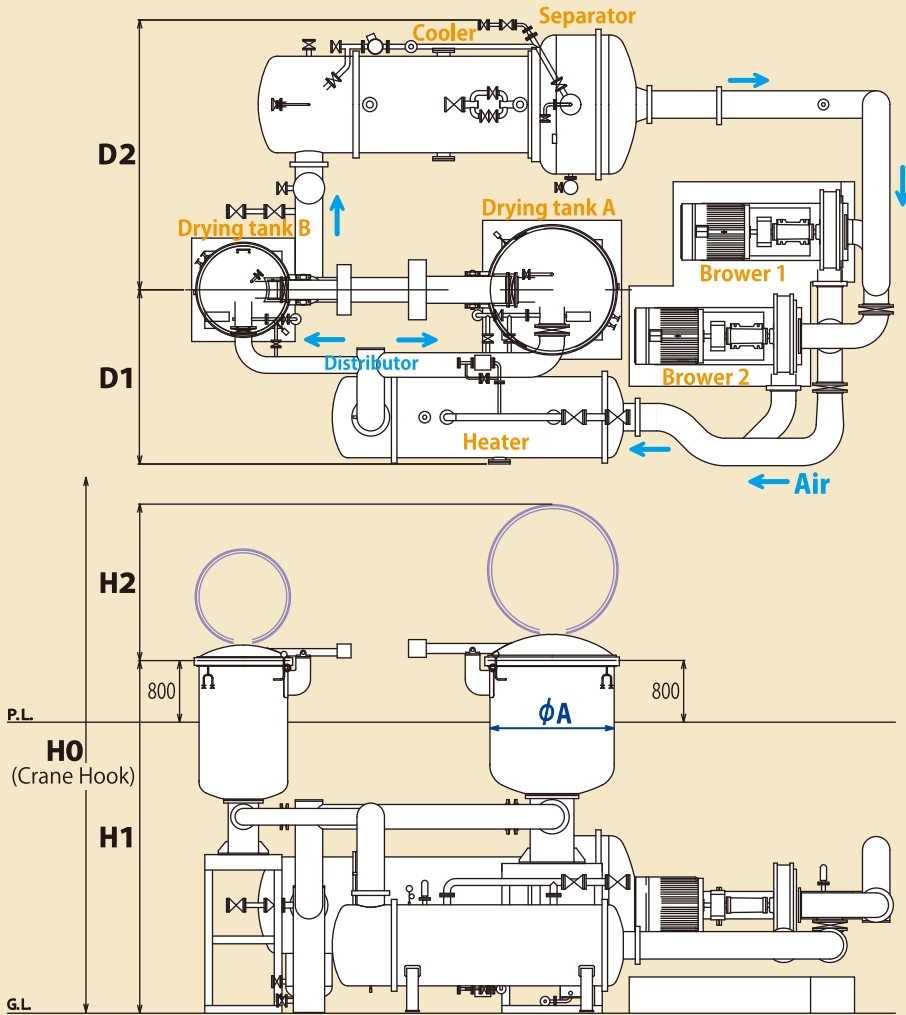

Solve the problem of small-volume drying.

- Be free to combine a capacity in pairs by pair drying. (ex : 200kg+50kg, 200kg+100kg, etc.)
- Individual or triple drying are possible by adopting a gate valve.
- Refilling for a small-volume drying is eliminated.
