The double blower structure offers high efficiency dehydration & drying.
- A connected, parallel and independent operations are possible.
- The effective method can be selected depending on the specification.

Solve the problem of small-volume drying.
- Be free to combine a capacity in pairs by pair drying. (ex: 200kg+50kg, 200kg+100kg, etc.)
- Individual or triple drying are possible by adopting a gate valve.
- Refilling for a small-volume drying is eliminated.
